

Can you tell the difference between an alligator and a crocodile?

These animals look alike.

They both have scales on their skin, sharp teeth in their mouths, and long tails.

Even though they have many similarities, they are different in many ways.

Alligators live in cool fresh water, while crocodiles live in warm salt water.

Crocodiles can grow much bigger than alligators.

They are much more dangerous too!

Either animal would not be fun to meet!

Martin Luther King, Jr. was born on Jan. 5, 1929 in Atlanta, GA.

As a child, he liked to play basketball and football and sing in his father's church.

Martin did very well in school. He went to college when he was only 15.

Then, in 1947 he became a preacher.

Martin married Coretta Scott in 1953.

For many years he worked hard to help people.

Finally, in 1963 he led a big march to Washington DC where he gave a speech about his dream of a world without hate.

**Sadly, five years later Martin Luther King Jr
was killed during the month of April.**

**Even though he died, his message is still alive
today.**
